

1/2" Girth Extensions for Roman or H-style Harnesses

A girth extension can be just the ticket when a dog needs something 'in between' stock girth sizes.

A buckle piece is sewn to either end of a matching (or solid color) piece of webbing, which then can simply be clipped into the girth to add a little wiggle-room. 4" is the stock length, but other lengths can be special-ordered.

Because different vintages of our buckles are NOT interchangeable, check the buckle of the harness against the two versions shown. These are the only 1/2" buckles we can provide girth extensions for.

Be sure to check both sides, front and back, of both buckle pieces, to ensure compatibility of the girth extension to the harness.

Please note that girth extensions are not suitable for Step In Harnesses.

3/4" Girth Extensions for Roman Harnesses

A girth extension can be just the ticket when a dog needs something 'in between' stock girth sizes.

A buckle piece is sewn to either end of a matching (or solid color) piece of webbing, which then can simply be clipped into the girth to add a little wiggle-room. 4" is the stock length, but other lengths can be special-ordered.

Because different vintages of our buckles are NOT interchangeable, check the buckle of the harness against the three versions shown.

Be sure to check both sides, front and back, of both buckle pieces, to ensure compatibility of the girth extension to the harness.

Please note that girth extensions are not suitable for Step In Harnesses.
